

ENVIRONMENTAL POLICY

Admiral Safety Limited is committed to protecting the environment by identifying any harmful aspects of its activities and their subsequent impacts.

The company operates a diesel car but elects to use public transport wherever practical.

Journeys and stop overs are planned with the environment in mind.

The company recycles all waste paper, and historic exam papers via council recycling services.

The company also recycles printer cartridges, batteries and all replacement IT equipment.

Printing of documents and the ordering of course workbooks is always limited to the exact number of course candidates, thereby resulting in minimum stock levels.
